

Phase 5 – Project Development Phase

Date	30-09-2026	Team ID	6ab4dd3aa238dc999eb5dbda
Project Name	Import Data using Transform Maps (Spreadsheet)		

5.1. Step-by-Step Implementation

Step 1 – Prepare the dataset

Create the spreadsheet with employee records and the fields Employee ID, Name, Email, Department and Location. The project documentation specifies an initial dataset of 15 employee records.

Step 2 – Create the target table

In ServiceNow PDI, create Employee Test (u_employee_test) and add the required String fields.

Step 3 – Load the spreadsheet

Use System Import Sets > Load Data to upload the spreadsheet and create Employee Import (u_employee_import) as the staging table.

Step 4 – Configure the Transform Map

Create Sample Spreadsheet Import and map the staging fields to the corresponding target fields.

Step 5 – Configure matching logic

Set Coalesce = True for Employee ID / u_employee_id so an existing employee can be matched rather than duplicated.

Step 6 – Run the transformation

Execute the import and verify that records are created in the Employee Test table.

Step 7 – Verify the target records

Open Employee Tests and confirm that the imported fields are populated correctly.

5.2. Implementation Screenshots

	A	B	C	D	E	F	G	H	I	J	K	L
1	Employee ID	Name	Email	Department	Location

Figure 5.1 – Source spreadsheet used for the employee data import.

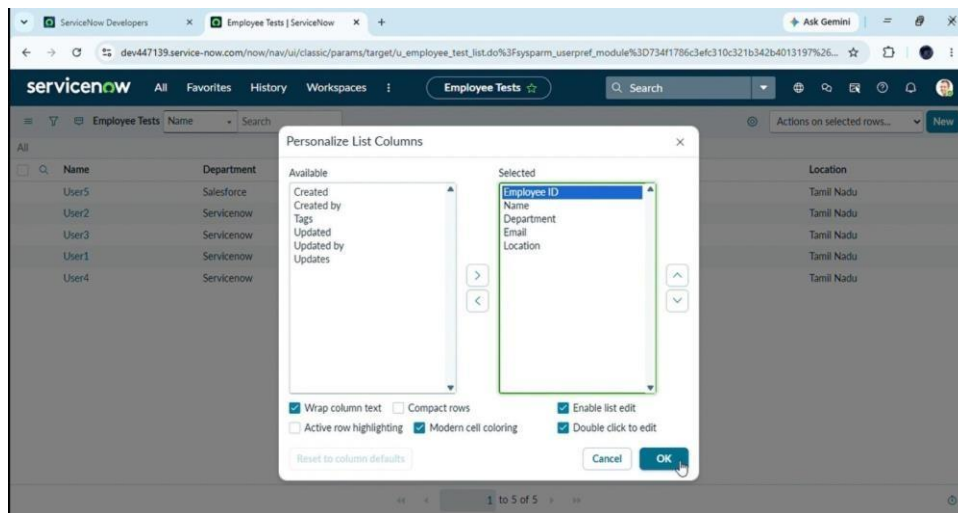

Figure 5.2 – Employee field configuration in ServiceNow.

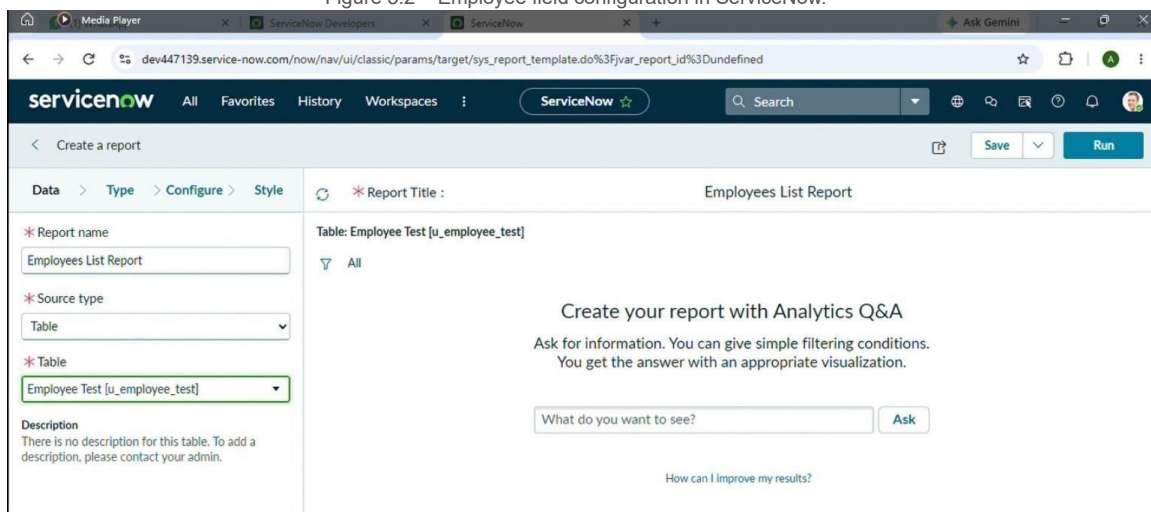

Figure 5.3 – ServiceNow report creation screen using the Employee Test table.

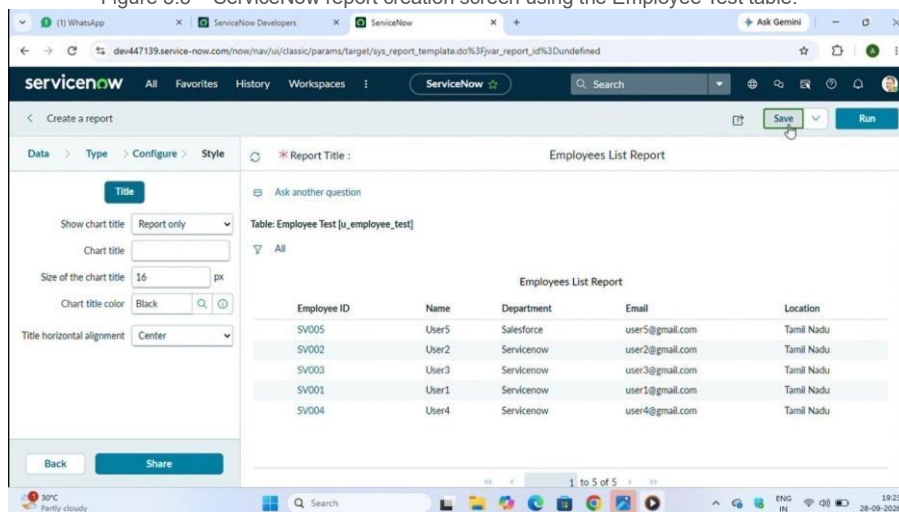

Figure 5.4 – ServiceNow report/list configuration showing employee records.

The screenshot shows the ServiceNow interface with the 'Employee Tests' table. The table has columns for Name, Department, Email, Employee ID, and Location. Five records are displayed, all with a Location of 'Tamil Nadu'.

Name	Department	Email	Employee ID	Location
User5	Salesforce	user5@gmail.com	SV005	Tamil Nadu
User2	ServiceNow	user2@gmail.com	SV002	Tamil Nadu
User3	ServiceNow	user3@gmail.com	SV003	Tamil Nadu
User1	ServiceNow	user1@gmail.com	SV001	Tamil Nadu
User4	ServiceNow	user4@gmail.com	SV004	Tamil Nadu
