

Phase 6 – Project Testing Phase

Date	30-09-2026	Team ID	6ab4dd3aa238dc999eb5dbda
Project Name	Import Data using Transform Maps (Spreadsheet)		

6.1. Testing Objective

Testing validates the initial bulk import, the Employee ID Coalesce rule, update-versus-insert behavior, and repeated imports without unnecessary database writes.

Test Case	Condition	Expected / Observed Result	Status
TC-01	Initial 15-row spreadsheet import	Complete; Success; Total 15; Inserts 15; Updates 0; Errors 0	Passed
TC-02	Set Coalesce = True on u_employee_id	Employee ID used as the unique matching criterion	Passed
TC-03	4-row test: 2 existing IDs (SB-0010, SB-0004)	Total 4; Inserts 2; Updates 2; Errors 0 + 2 new IDs (SB-0016, SB-0017)	Passed
TC-04	Re-upload the same 4-row dataset unchanged	Total 4; Inserts 0; Updates 0; Ignored 4	Passed

6.2. Test Results

- TC-01 confirmed successful ingestion of the initial 15 employee records.
- TC-02 confirmed Employee ID was configured as the matching field using Coalesce.
- TC-03 demonstrated that existing records were updated while new records were inserted.
- TC-04 demonstrated that a repeated unchanged upload produced ignored rows rather than duplicate or unnecessary writes.

6.3. Testing Screenshots

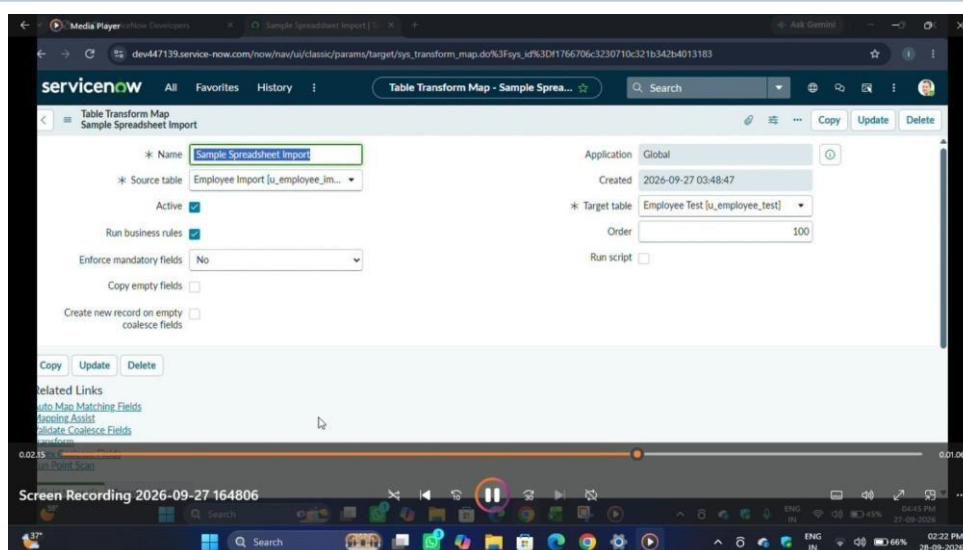

Figure 6.1 – Transform/import configuration screen captured during testing.

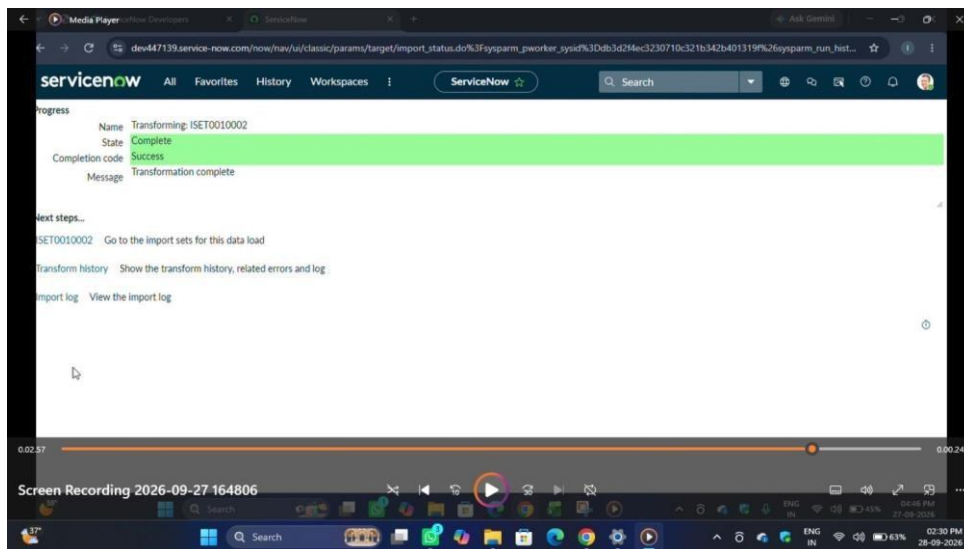

Figure 6.2 – ServiceNow processing/result screen showing a completed operation.

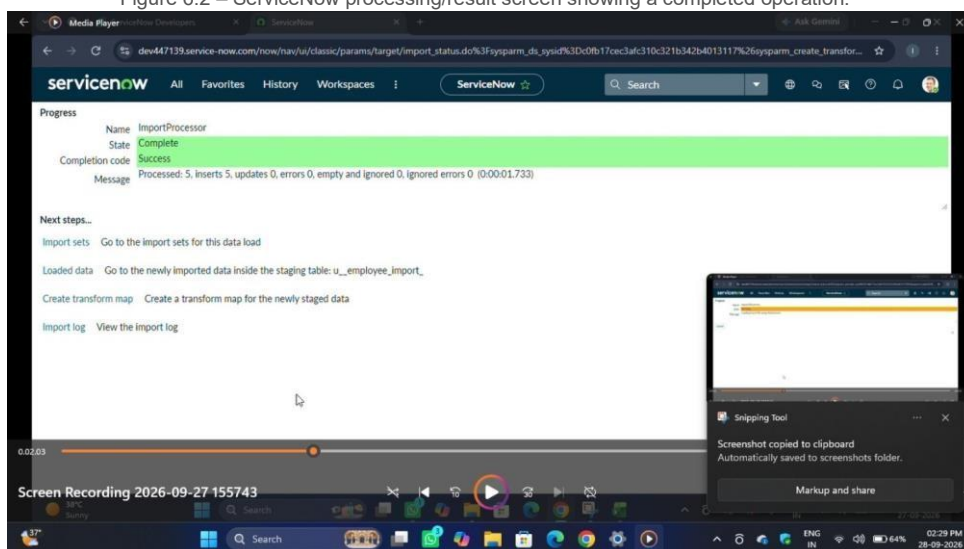

Figure 6.3 – ServiceNow result/processing view captured during the project test workflow.

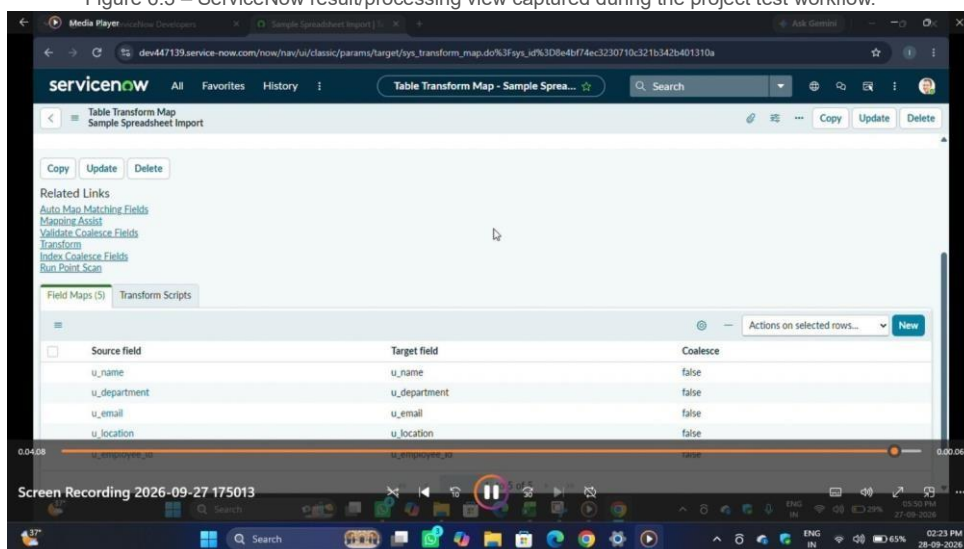

Figure 6.4 – ServiceNow table/data view used to verify records.

Name	Department	Email	Employee ID	Location
User5	Salesforce	user5@gmail.com	SV005	Tamil Nadu
User2	ServiceNow	user2@gmail.com	SV002	Tamil Nadu
User3	ServiceNow	user3@gmail.com	SV003	Tamil Nadu
User1	ServiceNow	user1@gmail.com	SV001	Tamil Nadu
User4	ServiceNow	user4@gmail.com	SV004	Tamil Nadu
